

ShowMeTheParts

ShowMeTheParts B2B GCommerce Edition, a Business to Business e-Commerce Solution for Wholesalers and Distributors

The new e-commerce tool integrates GCommerce's Virtual Inventory Cloud (VIC) system into websites powered by ShowMeTheParts (SMTP).

ShowMeTheParts B2B GCommerce Edition is the capstone to a system that addresses every aspect of parts ordering between mid-market manufacturers/suppliers and their direct channel partners. With SMTP B2B GCommerce Edition you can:

- Add drop-shipping and special ordering capabilities to your website.
- Give customers an account to see their own prices at log-in.
- Allow buyers to see information including compatibility, attributes, data sheets and even photos of the part before placing an order.
- Offer complete supply chain visibility to your distributors with access to GCommerce expertise in EDI transaction processing.
- Increase sales by capturing all of the demand for products in the long tail of the demand curve.
- Streamline your wholesale and distributor commerce processes - increasing sales with fewer resources.

GCommerce/VIC - EB009
