# Burn catalog CDs and post updates online with ShowMeTheParts Premium

Now you can generate custom CDs with all your catalog and application data – and post updates online – with our premium version of ShowMeTheParts.

Powered by new technology with Internet connectivity, it enables you to get critical product data into the field as often as needed, without incurring additional CD creation, production and distribution costs. Customers using your CDs can download updates at their convenience. Once downloaded, the data is seamlessly inserted into the CD catalog on their computer.

Designed with the same features as our standard version of ShowMeTheParts, it lets you link part numbers with applications, technical diagrams, photos, reference manuals and more; combine different files and formats into one; and output private label as well as custom CDs. You can also build in user rights to restrict certain functions and encrypt data and images for security.

The system installs on your current computer, eliminating unnecessary hardware, CD licensing fees or IT expenses. All the training you

need is included, enabling your staff to be up and running quickly.

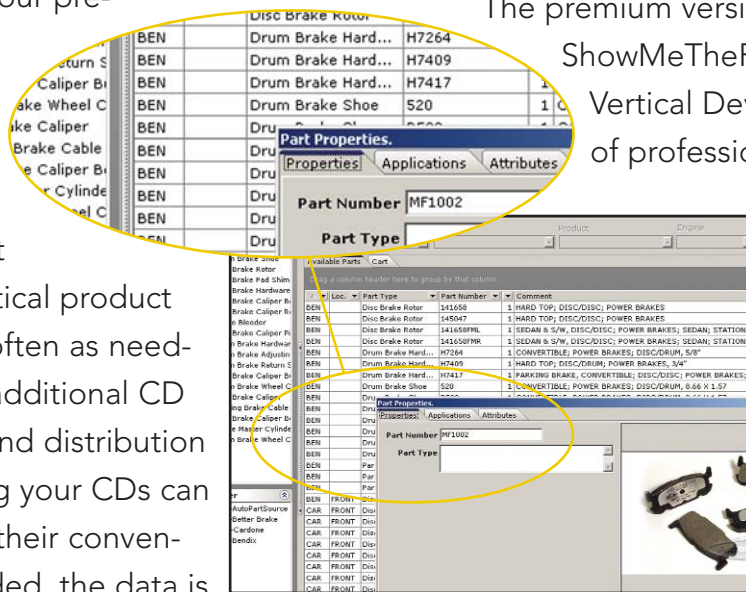

The premium version of

ShowMeTheParts is backed by Vertical Development – a team of professionals with over 20

years of experience in database management for the automotive aftermarket. From planning to delivery, we'll work with you one-on-one, giving you a system that

meets your specs, on time, on budget. And help you make the transition from a paper-driven to paperless system quickly, effortlessly.

Find out what our new premium version of ShowMeTheParts can do for your company. For a free demonstration, call Ron Garand 1-847-609-9540 or visit [www.verticaldev.com](http://www.verticaldev.com).
